BANK LOAN APPLICATION & PRE-SCREENING MANAGEMENT

USING ZOHO CREATOR

241401097

Assignment / Experiment Report

Name: Sharmila G

Roll No: 241401097

Department of Computer Science and Business Systems
Rajalakshmi Engineering College

1. AIM

To design and build a functional **"Bank Loan Application & Pre-Screening Management"** application in Zoho Creator that demonstrates the correct usage of the **13 Basic Fields** available in the Form Builder — Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, Drop Down, Radio, Multi Select, and Checkbox — and to model the underlying loan application workflow through a properly configured form, an auto-generated report view, and an **Entity-Relationship (ER) diagram**.

2. PROCEDURE

2.1 Application and Form Creation

- Logged into Zoho Creator and created a new application named **"Loan Application & Pre-Screening Management"**.
- Inside the application, opened the Form Builder and created the **Loan Application Form**, which contains all fields required for collecting applicant, contact, employment, income, and loan details.
- Created the form with the name **Loan_Application_Form**.
- A report named **Loan_Application_Report** was created to display all submitted loan applications.

2.2 Drag-and-Drop of Basic Fields

In the Form Builder, the Basic Fields palette was expanded on the left panel. Each required field was dragged and dropped onto the form canvas and configured through the Field Properties panel.

241401097

2.3 Configuring Field Properties

- The **Applicant_Name** field was configured using the Name field with First Name and Last Name sub-fields.
- The **Email_Address** field was configured with email format validation.
- The **Contact_Number** field was configured to accept an Indian mobile number with country code.
- The **PAN_Number** field was configured as a Single Line field.
- The **Monthly_Income** field was configured as a Number field with a value greater than zero.
- The **Date_Of_Birth** field was configured as a Date field for age eligibility verification.
- The **Loan_Type** Drop Down was configured with options such as Home Loan, Personal Loan, Education Loan, and Vehicle Loan.
- The **Employment_Type** Radio field was configured with **Salaried** and **Self-Employed** options.
- The **Existing_Liabilities** Multi Select field was configured with options such as Car Loan, Credit Card Dues, Personal Loan, Home Loan, and None.

- The **Consent_For_Credit_Check** Checkbox was configured to capture the applicant's agreement for a credit bureau check.

2.4 Submitting a Sample Record and Reviewing the Report

- Filled and submitted a sample Loan Application through the live form using the applicant name **"Sharmila"**.
- The email address used was **sharmila.g.2024.csbs@rajalakshmi.edu.in**.
- The submitted application was automatically added to the **Loan_Application_Report**.
- The report was configured as a List/Tabular view to display the submitted loan applications.
- The report was reviewed to verify important fields such as Applicant Name, Email, Phone, PAN Number, Monthly Income, Loan Type, Employment Type, Purpose of Loan, Existing Liabilities, and Consent.
- At least three sample loan application records were submitted and displayed in the report.

2.5 Data Modelling

An Entity-Relationship diagram was designed to document the data model underlying the loan application system.

The central entity **LOAN_APPLICATION** contains applicant details, contact information, employment details, income, loan requirements, existing liabilities, callback schedule, and credit-check consent.

The main relationships are:

- **APPLICANT → submits → LOAN_APPLICATION**
- **LOAN_APPLICATION → has → EMPLOYMENT_DETAILS**
- **LOAN_APPLICATION → requests → LOAN_DETAILS**
- **LOAN_APPLICATION → contains → LIABILITY_DETAILS**

This data model represents how applicant information is collected and used for loan pre-screening and document verification.

241401097

3. BASIC FIELDS USED

All 13 Basic Fields available in the Zoho Creator Form Builder were used while designing the Loan_Application_Form. The table below lists each field, the field name configured for it, and its purpose within the application.

Basic Field	Field Name Set	Purpose
Name	Applicant_Name	Captures the applicant's name
Email	Email_Address	Captures the applicant's email for communication
Address	Residential_Address	Captures the applicant's residential address

Basic Field	Field Name Set	Purpose
Phone	Contact_Number	Captures the applicant's mobile number
Single Line	PAN_Number	Captures the applicant's PAN number
Multi Line	Purpose_Of_Loan	Captures the purpose of the loan
Number	Monthly_Income	Captures the applicant's gross monthly income
Date	Date_Of_Birth	Captures the applicant's date of birth
Time	Preferred_Callback_Time	Captures the preferred callback time
Drop Down	Loan_Type	Allows selection of the required loan type
Radio	Employment_Type	Allows selection between Salaried and Self-Employed
Multi Select	Existing_Liabilities	Captures existing financial liabilities
Checkbox	Consent_For_Credit_Check	Records consent for credit bureau verification

4. FIELD VALIDATION RULES

241401097

The following validation rules were configured on the Loan_Application_Form to ensure accurate and complete data collection:

- Applicant Name — mandatory field.
- Phone (Contact_Number) — mandatory field.
- Date of Birth — mandatory field.
- Employment Type — mandatory field.
- Loan Type — mandatory field.
- Monthly Income — mandatory field.
- Consent for Credit Check — mandatory field.
- Email Address — must satisfy standard email format validation.
- Contact Number — must satisfy Indian phone number format with country code.
- Monthly Income — value must be greater than 0.
- Date of Birth — must satisfy the 18+ age eligibility criterion.
- Consent for Credit Check — checkbox must be checked before submission.

5. REPORT VIEW

Every loan application submitted through the **Loan_Application_Form** is automatically captured in the **Loan_Application_Report**, which was configured as a List/Tabular view.

A sample record was submitted using the applicant name **Sharmila** and the email address **sharmila.g.2024.csbs@rajalakshmi.edu.in**. The report was verified to correctly display the Applicant Name, Email, Phone, PAN Number, Monthly Income, Loan Type, Employment Type, Purpose of Loan, Existing Liabilities, and Consent fields, along with the additional sample records submitted for testing.

6. DATA MODELLING — ENTITY-RELATIONSHIP DIAGRAM

The Entity-Relationship diagram below documents the data model underlying the Bank Loan Application & Pre-Screening Management system, showing the central LOAN_APPLICATION entity and its relationships with the applicant, employment, loan, and liability details.

7. OUTPUT

The following screenshots capture the completed Bank Loan Application & Pre-Screening Management application in Zoho Creator.

7.1 Form Builder View

Shows the configured Basic Fields on the Loan_Application_Form canvas.

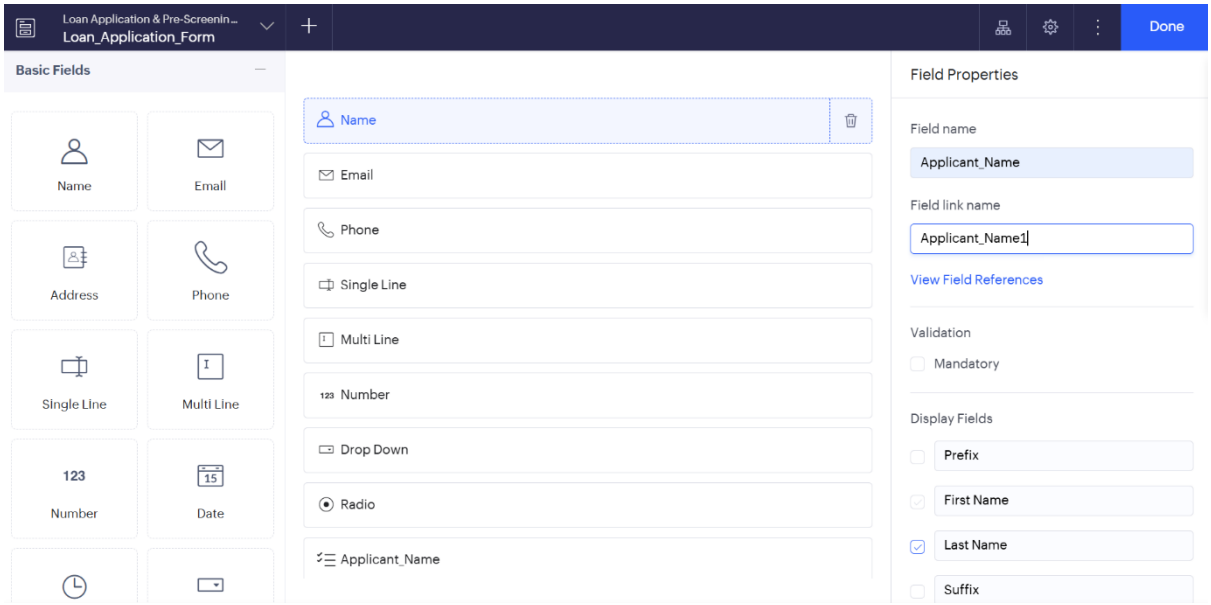

Fig. 1. Form Builder View — Configured Basic Fields

7.2 Report View — Tabular List of All Loan Applications

Displays all submitted loan applications in the Loan_Application_Report list view.

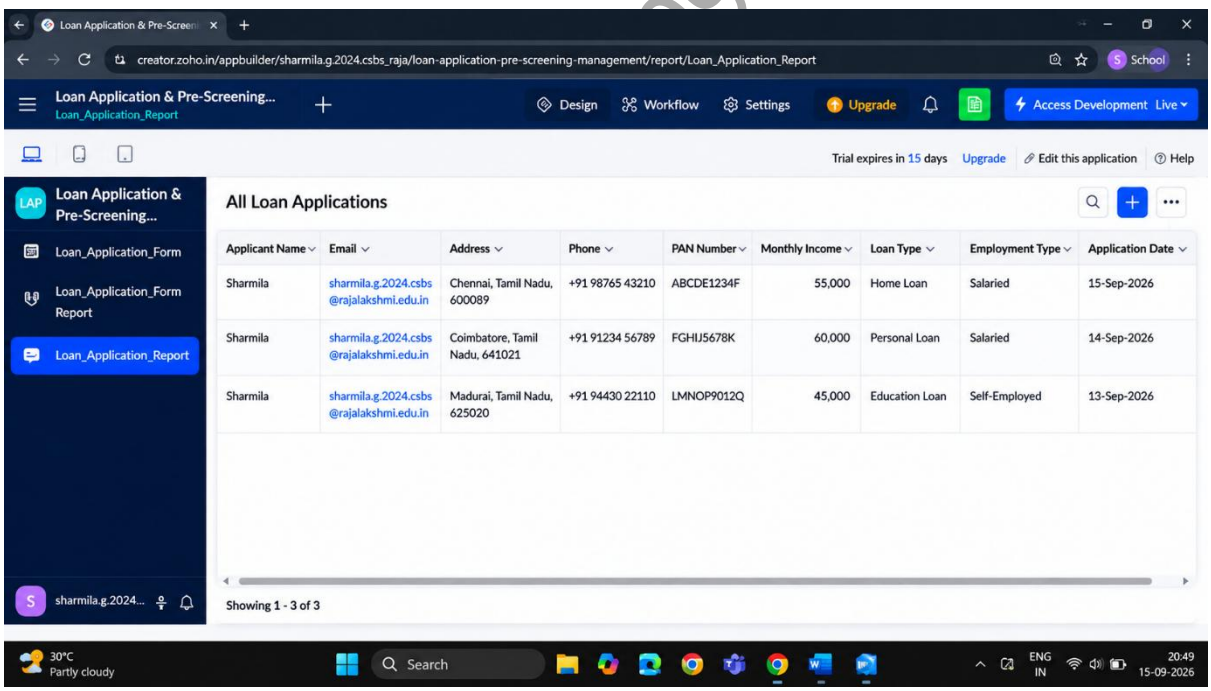

Fig. 2. Report View — Tabular List of All Loan Applications

7.3 Report View — Individual Record (Detail View)

Shows the detailed field values of a single submitted loan application record.

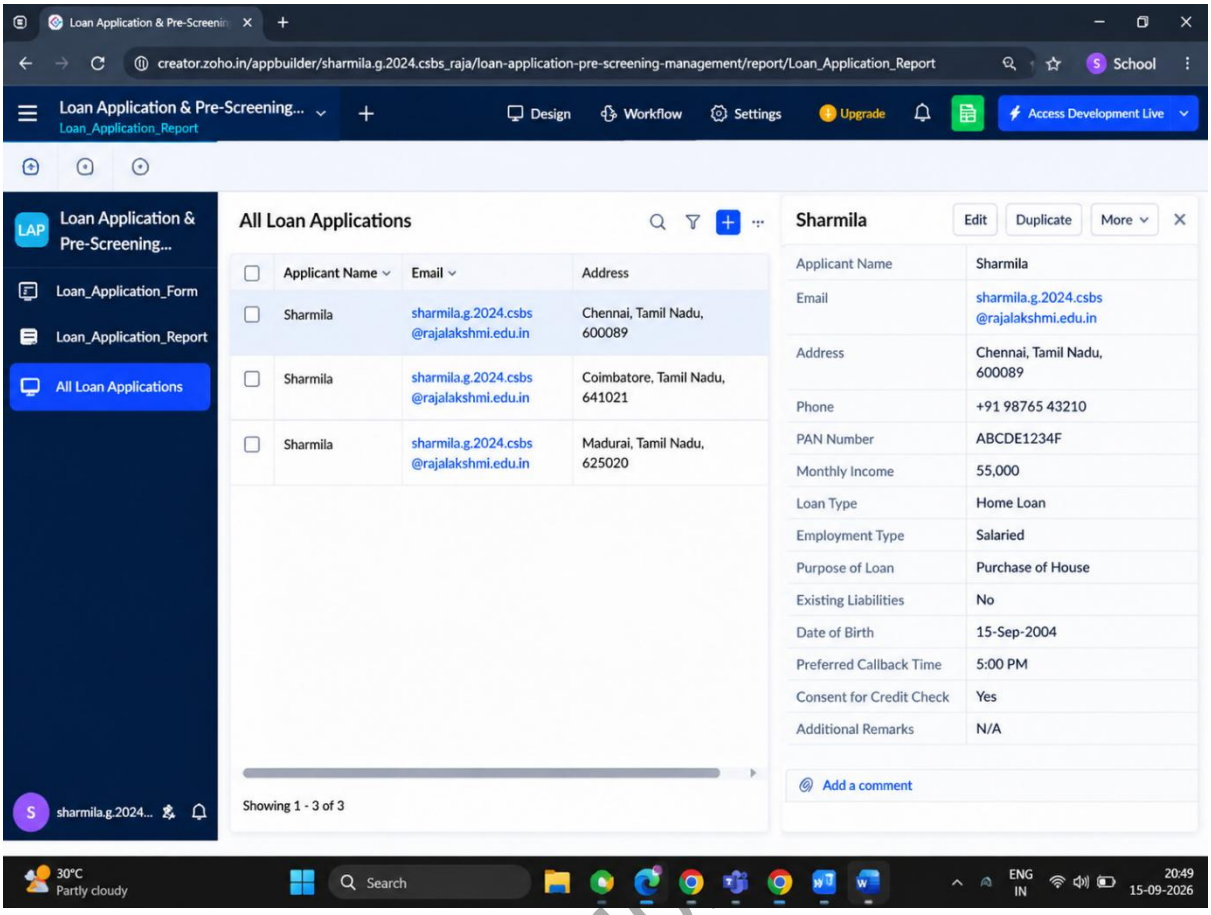

Fig. 3. Report View — Individual Record / Detail View

8. RESULT

The Bank Loan Application & Pre-Screening Management application was successfully designed and implemented in Zoho Creator using all 13 required Basic Fields, appropriate field-level validations, a functional report view, and a documented Entity-Relationship data model. The application correctly captures applicant, contact, employment, income, and loan-related information, and stores submitted applications in the Loan_Application_Report for pre-screening and document verification.
